43. (Cancelled).
44. (Cancelled).
45. (Cancelled).
46. (Cancelled).
47. (Previously presented). A composition comprising the reaction product of one or more trivalent metal salts other than chromium salts, an acid phosphorous compound and an aluminum hydroxy chloride, wherein said composition comprises:
- a). ferric chloride solution, the said ferric chloride solution being from about 38 wt. % to about 42 wt. % ferric chloride;
  - b). phosphorous acid solution, the said phosphorous acid solution being about 70 wt. % phosphorous acid;
  - c). aluminum chlorohydrate solution, the said aluminum chlorohydrate solution being about 50 wt. % phosphorous acid; and
  - d). optionally water; and
  - e). optionally either epichlorohydrin-dimethylacrylate polymer or polydiallyldimethylammonium chloride polymer.
48. (Currently amended). ~~The composition of Claim 76 comprising:~~ A composition comprising the reaction product of one or more trivalent metal salts other than chromium salts, an acid phosphorous compound and an aluminum hydroxy chloride, wherein said composition comprises:

Nalco Docket No. 7502 CO2

- a). about 50.92 wt. % ferric chloride solution;
- b). about 11.29 wt. % phosphorous acid solution; and
- c). about 37.79 wt. % aluminum chlorohydrate solution.

49. (Currently amended). ~~The composition of Claim 76 comprising:~~ A composition comprising the reaction product of one or more trivalent metal salts other than chromium salts, an acid phosphorous compound and an aluminum hydroxy chloride, wherein said composition comprises:

- a). about 46.85 wt. % ferric chloride solution;
- b). about 10.39 wt. % phosphorous acid solution;
- c). about 34.76 wt. % aluminum chlorohydrate solution; and
- d). about 8.00 wt. % epichlorohydrin-dimethylacrylate polymer.

50. (Currently amended). ~~The composition of Claim 76 comprising:~~ A composition comprising the reaction product of one or more trivalent metal salts other than chromium salts, an acid phosphorous compound and an aluminum hydroxy chloride, wherein said composition comprises:

- a). about 25.49 wt. % ferric chloride solution;
- b). about 8.94 wt. % phosphorous acid solution;
- c). about 18.95 wt. % aluminum chlorohydrate solution;
- d). about 9.71 wt. % polydiallyldimethylammonium chloride polymer; and
- e). about 36.91 wt. % water.
